## EQUIPMENT PARTS & COMPONENTS

## COMPANY PROFILE

OPEN CAST MINING

GENERAL CONSTRUCTION

UNDERGROUND MINING

When operations can't stop, **EPC Namibia delivers the parts and solutions** that keep the continent's machinery moving.

## WHO WE ARE

Equipment Parts and Components (EPC) Namibia is a trusted supplier of high-quality parts, components, and machinery serving the mining, construction, and earthmoving industries across Africa. With a strong global sourcing network and long-standing international partnerships, we provide reliable new, used, and reconditioned parts for leading brands including Caterpillar, Hitachi, Komatsu, and Liebherr.

EPC Namibia has grown from a small earthmoving parts provider into a regional leader with a proven track record in quality, service, and procurement expertise. Our global reach enables us to source equipment, dismantled machinery, and genuine new parts at competitive prices, offering our customers an affordable and dependable alternative to OEM suppliers.

Backed by a knowledgeable team and an extensive inventory, EPC Namibia simplifies your supply chain by offering a single, trustworthy source for all earthmoving requirements. With our commitment to performance, durability, and customer satisfaction, we continue to deliver "Parts that move earth" and solutions that keep your operations strong.

# PARTS THAT MOVE EARTH

01

[www.epc.com.na](http://www.epc.com.na)

# WHAT WE DO

- + Electrical Parts
- + Fire Suppression
- + Engine Parts
- + Filters
- + Ground Engaging Tools
- + Seating
- + Drive Trains
- + Undercarriage

- + Surplus Parts
- + Seals and Gaskets
- + Body and Frame
- + Cab Glass
- + Hydraulic Parts
- + Hardware
- + Cooling System
- + Hose and Couplings
- + Lubrication Parts

# ENGINE PARTS

One of our key advantages is our extensive product selection, featuring a diverse array of components essential for the seamless functioning of engines. By choosing EPC for your engine parts needs, you're selecting a partner dedicated to providing outstanding quality and service.

Our wide range of parts is sourced from esteemed manufacturers, guaranteeing reliability and performance in every item. We recognise the distinct requirements of the mining industry and customise our offerings to address these specific demands, delivering solutions that enhance both the efficiency and longevity of your engines.

When you're in search of engine parts, EPC is your ultimate destination. We provide an extensive selection of parts and components.

- + **Cylinder Kit Parts**
- + **Cylinder Head and Valve Train Components**
- + **Engine Bearings and Bushings**
- + **In-Frame and Out-of-Frame Kits**
- + **Camshafts and Crankshafts**
- + **Comprehensive Gasket Coverage**
- + **Oil and Water Pumps**
- + **Oil Coolers and Aftercoolers**
- + **Turbochargers**

# FIRE SUPPRESSION

Heavy-duty equipment fires can be catastrophic for any operation. Just one malfunctioning machine can lead to significant losses in production daily. Fire poses a considerable risk to operators, assets, and overall productivity. That's why fire suppression systems are designed to endure even the harshest conditions with reliability.

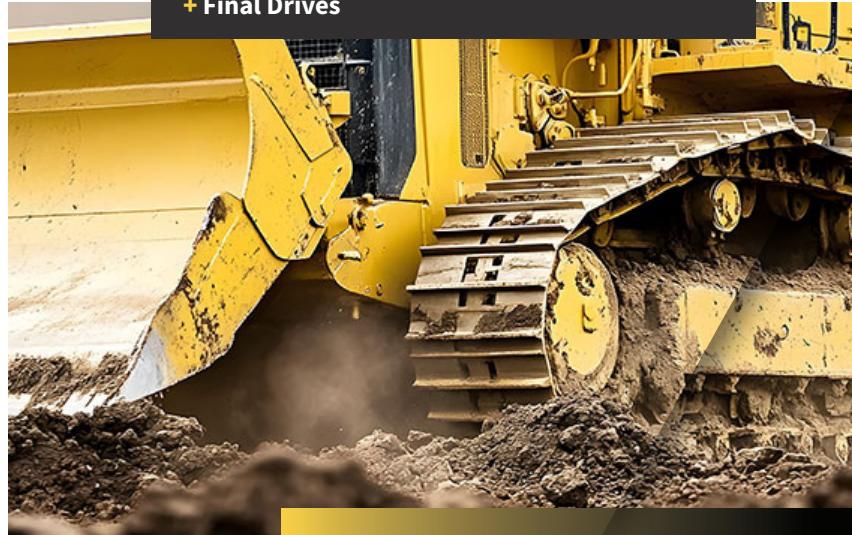

- + **Dry Chemical System**
- + **Liquid Chemical Systems**
- + **Dual Agent Systems**
- + **Compact Liquid Agent System**
- + **Detection & Monitoring**
- + **Accessories**

# DRIVE TRAINS

A machine's drivetrain is responsible for transferring power from the engine to the wheels or tracks, a critical function in any earthmoving or mining operation. High-quality drivetrain components ensure your equipment operates efficiently, safely, and consistently, even in demanding conditions.

From propulsion to load handling, every part of the drivetrain must perform reliably to keep your operation productive.

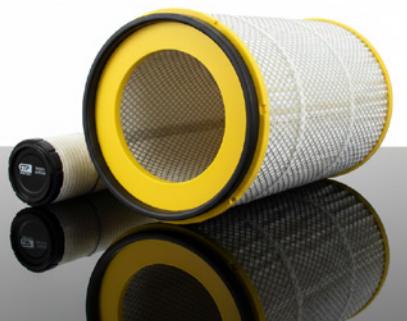

# FILTRATION

In harsh, high-dust conditions, effective filtration is essential to protect your machinery, reduce downtime, and maintain peak performance. EPC Namibia's filtration range is engineered to remove even the finest contaminants from air, fuel, oil, and hydraulic systems, helping extend equipment life and safeguard your operation.

- + Air Filters
- + Air Filter Indicators
- + Cabin Air Filters
- + Filters for Komatsu®
- + Fuel Filters
- + Hydraulic Filters
- + Oil Filters
- + Strainers
- + Water Separator Filters

## SERVICE KITS

For fleet owners and workshops, we also offer complete service kits, for example, a 500-hour service kit for a 140G, containing all the filters you need in one convenient package. Whatever machinery you operate, our filters are built to deliver reliable, high-efficiency performance in Namibia's toughest environments.

# G.E.T

(GROUND ENGAGING TOOLS)

At EPC Namibia, we supply a comprehensive range of high-durability Ground Engaging Tools engineered for the demanding conditions of the mining and earthmoving sectors.

G.E.T are among the most critical components on any earthmoving machine. From blades and end bits to complete buckets, tips and wear protection, the right G.E.T set directly influences productivity, fuel efficiency, and overall operating cost. Selecting the correct tooling, and managing it effectively – is essential for maintaining output and minimising preventable downtime.

- + Blades & End Bits
- + Complete Buckets
- + Bucket Protection
- + Half Arrows
- + Tips & Adapters
- + G.E.T. Hardware
- + Wear Plates

## SURPLUS STOCK

EPC, in partnership with CapiParts in South Africa, supplies genuine OEM surplus parts for CAT® and Caterpillar® machinery at savings of 40%–60% off standard OEM pricing. These are authentic components—often still in original Caterpillar® packaging—offering the same reliability at a fraction of the cost.

Sourced through global overstock and surplus channels, our parts deliver premium quality with exceptional value. In addition to Caterpillar® surplus, EPC also supplies new aftermarket, rebuilt, and used parts for Caterpillar® and other leading brands, including Komatsu®.

**GET IN TOUCH TO FIND OUT WHAT SURPLUS WE HAVE IN STOCK.**

# COOLING SYSTEMS

EPC Namibia supplies high-quality cooling system components to keep heavy-duty and earthmoving machinery operating at safe temperatures. Efficient cooling is critical in demanding environments, preventing overheating, reducing downtime, and protecting vital engine components—ensuring reliable performance and extended engine life.

- + Radiator Cooling Fans
- + Reversible Fans
- + Fan Drives
- + Radiator Cores
- + Water Pumps
- + Thermostats
- + Water Pump Regulators
- + Oil Coolers

# SEATING

Operator comfort is directly linked to productivity, focus, and safety. EPC's seating solutions—featuring industry-leading SEARS seats—are designed to reduce Whole Body Vibration (WBV), decrease operator fatigue, and minimise the long-term strain caused by operating heavy machinery.

Built with ergonomic design, advanced suspension, and high-quality materials, our seating range provides exceptional support and smooth performance even on the toughest terrain.

- + Sears Air Suspension Seats
- + Sears Mechanical Suspension Seats
- + Sears Compact Seats
- + Sears Heavy-Duty Mining Seats
- + Sears Operator & Loader Seats

# BODY & FRAME

- **Bogies**
- **Bucket Links**
- **Equalizer Bars**
- **Equipment Mounts**
- **Frame Assemblies**
- **Guards**
- **Rims and Wheels**
- **Suspension Mounts**

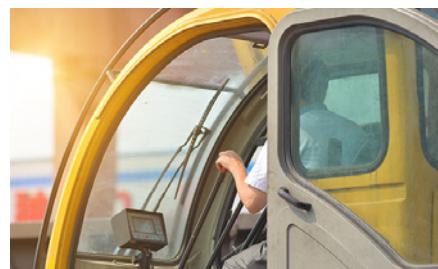

EPC's commitment to innovation and quality is evident in every component we supply. Each item is thoroughly engineered and rigorously tested to meet strict industry standards, ensuring exceptional durability and dependable operation.

Whether you are reinforcing existing machinery or outfitting equipment for new projects, our frame and body components help reduce maintenance costs, improve operational stability, and enhance overall machine performance.

# CABIN GLASS

Our cab glass solutions are crafted with precision to ensure a perfect fit and enhanced safety for operators. We understand the importance of visibility and protection in the field, which is why our glass is made from high-quality, durable materials designed to withstand the harshest conditions. Whether you're replacing a windshield or side window, our products maintain clarity and resilience, providing operators with the confidence to perform their tasks efficiently and safely.

# AIR CONDITIONING

EPC Namibia is a leading provider of transport temperature control systems, delivering reliable, high-performance solutions tailored to Namibia's demanding conditions. Designed for seamless integration into trucks and large earthmoving machinery, our systems serve industries including agriculture, mining, and logistics.

Built with durability, innovation, and efficiency in mind, EPC Namibia is committed to customer satisfaction—offering not just products, but dependable solutions that support operational performance and long-term business success.

- ✚ Electric AirCon for Off-Road Vehicles
- ✚ Fully Electric Refrigeration Units
- ✚ Truck Refrigeration Units
- ✚ Mobile Trailer Units
- ✚ Diesel Engine Units

# THERMAL INSULATION

Removable Insulation Blankets serve to insulate engine components, exhaust piping, and various industrial process machinery. Particularly in applications utilizing diesel engines, such as power generation, off-highway equipment, trucks, light vehicles, and marine vessels; these blankets are essential for managing the heat produced by these engines.

With our extensive library of patterns and designs, we can provide custom removable blanket kits tailored to fit nearly all engine and machine brands, including leading brands that are popular in fleets across Namibia.

## MORE ABOUT THE PRODUCT:

- **Custom manufactured covers** tailored to meet each client's specific needs and requirements.
- **Locally manufactured thermal shields** (covers) to support local industry.
- **Use of market-leading textiles** in the construction of our thermal shields.
- **Extended lifespan** designed specifically for mobile equipment operating in harsh mining environments.
- **Competitive lead times and pricing** for our products.
- **World-class insulation values** to ensure optimal performance.
- **Ease of installation** and ergonomic advancements related to fiber exposure.
- **Implementation of stainless steel embossed foil** for enhanced protection and longevity.

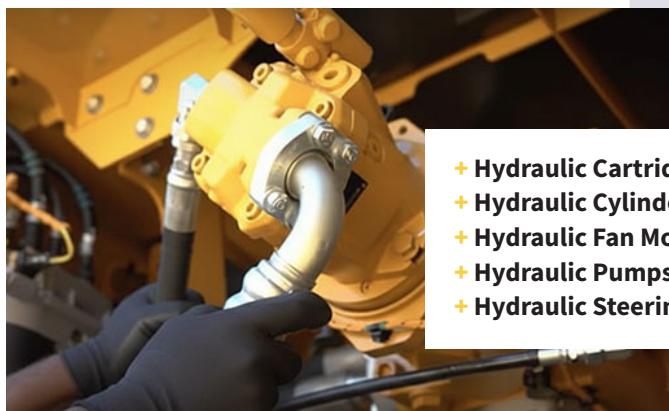

# ELECTRICAL PARTS

EPC Namibia supplies a comprehensive range of high-quality electrical parts for earthmoving equipment, tested to ensure reliable performance in harsh operating conditions. Our components support machine safety, efficiency, and reduced downtime, keeping your equipment running without interruption.

- + Air Conditioning Compressors
- + Alarms & Horns
- + Alternators
- + Batteries
- + Cable Harnesses
- + Circuit Breakers
- + Electrical Starting Motors
- + Ignition Switches
- + Lights & Warning Lights
- + Sensors & Speed Sensors
- + Solenoids and Magnetic Switches
- + Fuses and Relays

# HYDRAULIC PARTS

- + Hydraulic Cartridges
- + Hydraulic Cylinders
- + Hydraulic Fan Motors
- + Hydraulic Pumps
- + Hydraulic Steering

EPC Namibia offers a comprehensive range of high-performance hydraulic components designed to deliver consistent power, precision, and durability. Engineered for reliability in the toughest operating conditions, our hydraulic parts support smooth and efficient machine operation across a wide variety of applications.

# LUBRICATION PARTS

EPC Namibia supplies robust lubrication systems designed to keep machinery operating smoothly, efficiently, and reliably. From compact equipment to large-scale industrial machines, our solutions deliver precise, consistent lubrication to critical components, reducing friction, wear, and the risk of premature failure. Built for harsh working environments, EPC lubrication systems are engineered for durability, accuracy, and long-term operational performance.

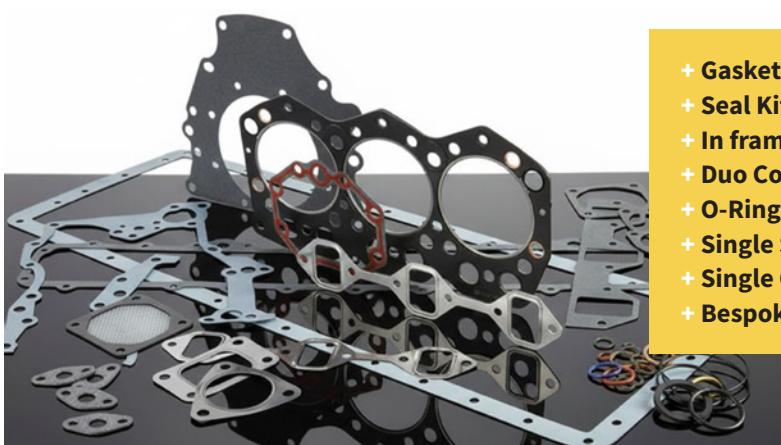

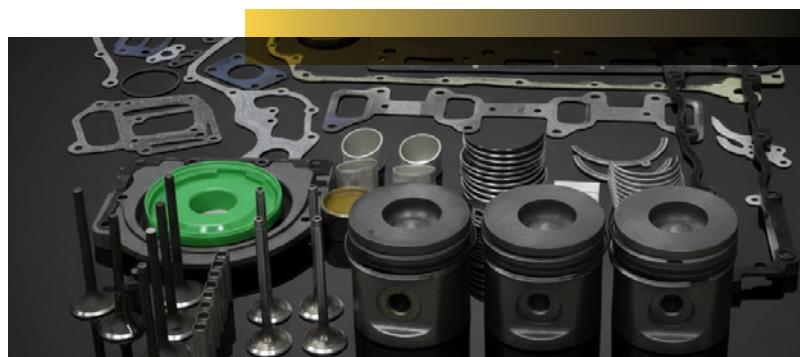

- + Progressive grease systems
- + Centromatic Single Line
- + Dual Line grease systems
- + Workshop and Lube Bay dispensing systems
- + Spray and Chain lubrication
- + Larger turnkey projects
- + Processing Plant Lubrication Systems

# SEALS & GASKETS

EPC Namibia supplies a comprehensive range of seals and gaskets, with a strong focus on Bulldog products, designed for heavy-duty and industrial applications. Engineered for durability and precision, our sealing solutions prevent leaks, protect system integrity, and extend equipment life in demanding operating conditions.

- + Gasket Kits
- + Seal Kits
- + In frame & Out of Frame
- + Duo Cone Seals
- + O-Ring Kits
- + Single Seals
- + Single Gaskets
- + Bespoke Kitting

# HOSE & COUPLINGS

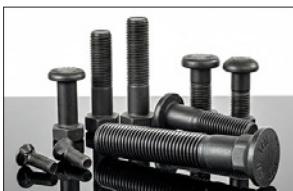

EPC Namibia supplies high-quality hoses and couplings designed for hydraulic and fluid transfer systems in demanding industrial environments. These products are built to handle high pressures, tough operating conditions, and continuous performance requirements, ensuring safe and efficient fluid flow across your machinery and equipment.

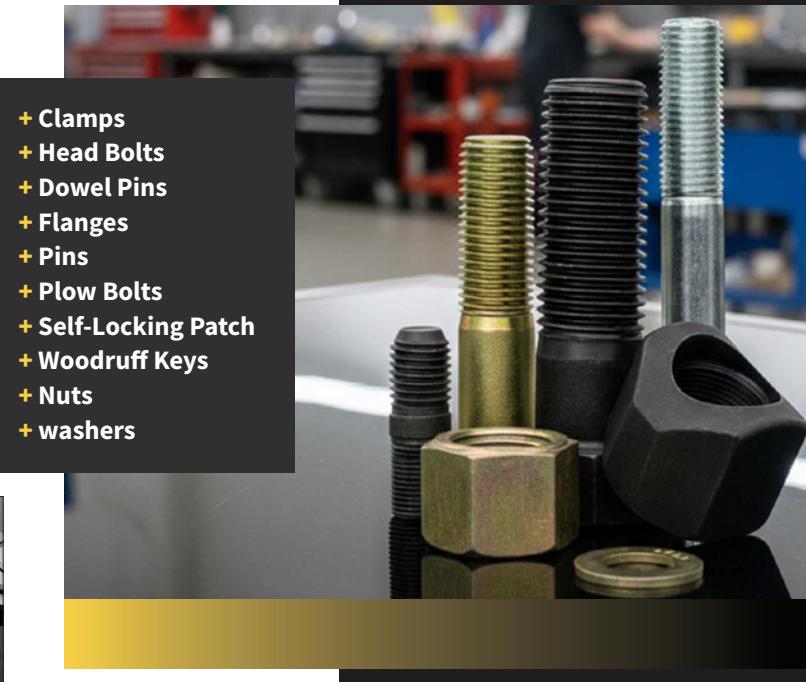

- + Hose Couplings
- + Hydraulic Hose Assembly

# HARDWARE

High-quality hardware plays a crucial role in ensuring the reliability, stability, and longevity of your equipment. From fastening components to precision alignment parts, these elements are essential for maintaining structural integrity and optimal machine performance. EPC Namibia supplies hardware engineered for demanding industrial, construction, mining, and agricultural environments, helping your machinery operate safely and efficiently in any application.

- + Clamps
- + Head Bolts
- + Dowel Pins
- + Flanges
- + Pins
- + Plow Bolts
- + Self-Locking Patch
- + Woodruff Keys
- + Nuts
- + washers

# UNDERCARRIAGE

Your machine's undercarriage absorbs constant wear, impact, and abrasion—making it one of the most critical systems to maintain for long-term performance. EPC Namibia provides undercarriage components engineered for durability, stability, and strength across all machine makes and models.

- + Track Chains
- + Track Shoes
- + Rollers
- + Sprockets
- + Idlers
- + Undercarriage
- + Grouser Bars

# MACHINE SALES

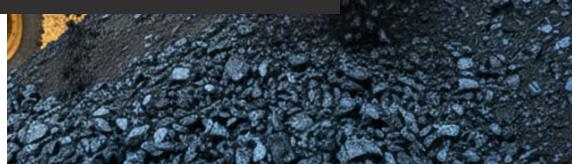

EPC Namibia supplies reliable, high-quality machinery built for demanding mining, construction, and industrial environments. Every machine we sell is carefully inspected and tested to ensure performance, durability, and long service life.

- Fully inspected and quality-checked machinery
- Proven performance in tough working conditions
- Aftersales support and technical guidance
- Maintenance and repair assistance
- Warranty options for added peace of mind

**WE DON'T JUST SELL MACHINES,  
WE SUPPORT THEM LONG AFTER DELIVERY.**

# OUTRIGHT SALES

## COMPONENTS

EPC Namibia offers **outright component sales** across a wide range of machinery makes and models. This is a simple, direct purchase option, no exchange required.

Our stock is built to support mining, construction, and agricultural equipment, helping you reduce downtime and keep your machines working.

- ✚ New and quality-tested components
- ✚ No service exchange required
- ✚ Wide stock for multiple machine brands
- ✚ Fast access to ready-to-supply parts

# SERVICE EXCHANGE

## COMPONENTS

EPC Namibia offers a **service exchange program** that allows you to purchase quality components while returning your old unit within a specified time. This reduces costs, supports sustainability, and keeps your machinery running with minimal downtime.

This option is ideal when you need reliable parts quickly without the cost of outright replacement.

### HOW DOES IT WORK

- ✚ You purchase a component from EPC Namibia
- ✚ Your old unit (core) is returned within an agreed timeframe
- ✚ The returned unit is refurbished or rebuilt

# FIELD SERVICE

EPC Namibia's Field Service provides fast, professional on-site support to keep heavy equipment operating at peak performance across Namibia. With skilled technicians, fully equipped mobile service units, and a deep understanding of local operating conditions, we minimise downtime and deliver reliable maintenance and repair solutions — wherever your project is based.

## Key Highlights

- ✚ **Mobile Expertise:** Certified technicians and fully equipped service vehicles ready for on-site diagnostics and repairs
- ✚ **Downtime Focused:** Fast response, efficient repairs, and preventative maintenance to keep operations moving
- ✚ **Namibia-Ready:** Proven experience in remote, high-demand mining, construction, and earthmoving environments

# LOWBED HIRE

EPC Namibia offers reliable lowbed hire solutions designed to move heavy, oversized, and high-value equipment safely across Namibia's demanding terrain. Backed by a robust fleet, experienced operators, and deep local knowledge, we provide dependable heavy haulage for construction, mining, agriculture, and industrial projects — delivering peace of mind from collection to delivery.

## Key Highlights

- ✚ **Built for Namibia:** Heavy-duty lowbeds engineered for tar, gravel, and remote site access
- ✚ **Locally Experienced:** Namibian-based teams with proven route, regulation, and permitting expertise
- ✚ **Safe & Professional:** Certified operators, strict safety standards, and secure load handling
